

MEDICAL

We have 15 exam rooms including 3 dedicated pediatric exam rooms and one special Elders room, where we provide a variety of services throughout the patient's life cycle. As a family practice, we have a variety of medical providers, nurses, and support staff. As a patient here, you can choose a primary care provider or PCP. Each provider's availability may differ. Your PCP will be the provider you choose to see for most of your visits and the provider who knows you best.

Services

- Primary care: care of chronic health conditions & acute care for minor illnesses and injuries
- Pediatric services
- Nurse triage and nurse care management
- COVID-19 testing & vaccinations

- Lab services
- CHR medical transport

Emergency medical care

If you are experiencing a medical emergency, dial 911 and seek emergency medical care immediately.

After-hours and urgent care

If you are experiencing a non-life-threatening health emergency when the Nisqually Tribal Health & Wellness Center is closed, please see an urgent care provider near you. **Always call 911 for life-threatening emergencies.**

Urgent care provides convenient, immediate access to medical care as a better choice over the emergency room for non-life-threatening healthcare needs.
